

CREATIVE AGENCY · PRODUCT & PLATFORM OVERVIEW

BRAIIN STATION

A full creative agency website, an AI style-finder, a ranking-built content engine, and a complete admin platform — one system, end to end.

Feature walkthrough for stakeholders & engineering

Agenda

01

The Vision

What Brain Station is and why it exists

02

The Public Site

Every page visitors experience, end to end

03

AI Style-Finder

Guided discovery app that converts visitors

04

Creative Knowledge

The blog engine built to rank everywhere

05

Admin & CMS

How the whole site is run from the inside

06

Systems & Roles

Cross-cutting platform + the four roles

07

Technology

Astro framework & architecture choices

08

Roadmap

What's next and open items

SECTION ONE

The Vision

A creative studio that runs like a product company — capturing demand, converting it, and proving what works.

01

One platform, four products

Public Site

- Marketing + portfolio for 14 services
- Every section CMS-driven & re-orderable
- Bilingual EN / AR, RTL-ready

AI Style-Finder

- Guided quiz finds a client's style
- AI recommends the right service mix
- Turns browsers into qualified leads

Knowledge Blog

- Blog engine built for SEO / GEO / AEO
- Structured data for AI answer engines
- Every article routes readers to contact

Admin & CMS

- Run the entire site without code
- Roles, analytics, media, scheduling
- Audit-logged and permission-gated

The thread tying it together: everything a visitor sees is dynamic, measured, and tuned from one admin.

WHAT WE DELIVER

14 services under one roof

Branding	Animations	Motion Graphics	Videography
Photography	Montage	Event Planning	Advertising
Social Media	Web Development	SEO · GEO · AEO	Music
Merchandise	Gaming		

SOON

13 services live at launch · Gaming arrives as a teaser, then a full line.

SECTION TWO

The Public Site

Every page a visitor touches — composed from CMS sections, measured, and tuned for conversion.

02

The landing page

NEW

Hero — your choice

- Logo-art hero with a button into Services
- Or a portfolio showreel video instead
- Admin picks the variant per campaign

Clients & services

- Animated client-logo marquee strip
- Services overview grid, each linking out
- Conversion band + social links section

Composed from sections

- Any section hidden, shown, or re-ordered
- Styled from the admin — no code
- One broken section can't down the page

Found & rich in search

- Meta tags + Organization / WebSite schema
- JSON-LD for rich Google results
- Built for AI answer engines from day one

Services index & detail

Services index

- All 14 services browsable as cards
- CMS-managed display order
- Optional grouping by category

Service detail page

- Opens with a per-service hero video
- Rich body: process & deliverables
- Bilingual-ready content blocks

Linked portfolio

- Related case studies per service
- Relation between services & portfolio
- Proof of work right where it sells

Built to convert

- Clear path from service to inquiry
- Captured as a lead with service interest
- Feeds service-demand insights

Portfolio, About, Contact & Search

Portfolio

- Showcase of work across services
- Filterable, CMS-managed entries
- Links back into relevant services

About Us

- Studio story, team, and values
- Fully editable content sections
- Bilingual narrative, RTL-ready

Contact

- Project-inquiry form with service field
- Submissions captured as leads
- Routed for fast follow-up

Search & utilities

- Site-wide search across content
- Dynamic pages, 404 & hidden pages
- Maintenance mode + visitor tracking

SECTION THREE

AI Style-Finder

A guided web app that helps a visitor discover their creative style — and turns that moment into a qualified lead.

03

How it works

01

Guided quiz

Visitor answers a short, visual set of questions about taste and goals.

02

Style library

Answers map against a curated library of creative styles.

03

AI recommendation

AI suggests the styles and services that fit them best.

04

Lead conversion

Result hands off into contact — captured as a qualified lead.

Presented here at a high level — a dedicated product spec defines the question logic, style taxonomy, and AI model.

SECTION FOUR

Creative Knowledge

A bilingual content engine engineered to rank on Google and to be cited by AI answer engines.

04

Built for readers & ranking

Article experience

- Listing + clean article detail pages
- Auto table-of-contents from headings
- Author box & related posts

Answer-engine ready

- Key-takeaways + speakable schema
- FAQ schema for rich results
- Structured for AI citation (GEO / AEO)

Bilingual content

- Full EN / AR article support
- RTL-aware layout & typography
- Language-aware metadata

Reader → client

- Contextual CTAs inside every article
- Routes interested readers to contact
- Content that earns leads, not just traffic

SECTION FIVE

Admin & CMS

The control room: everything on the public site is created, scheduled, measured, and governed from here.

05

Sign in to a live dashboard

Auth & accounts

- Secure sign-in for staff accounts
- Role assigned per user
- Session + access governed centrally

Overview dashboard

- At-a-glance health of the whole site
- Recent activity & key metrics
- Service-demand insights surfaced here

Service-demand insights

NEW

- Which services draw the most interest
- Powered by service-of-interest on leads
- Guides where to invest creative effort

Notifications

- New-lead and activity alerts
- Keeps the team responsive
- Surfaced in-dashboard

Manage everything visitors see

Services

- Create & edit all service pages
- Hero video, body, category
- Link related portfolio
- Control display order

Creative Knowledge

- Write & publish articles
- Rich-text editor (Tiptap)
- Schema & SEO fields per post
- Bilingual EN / AR

Portfolio

- Add & organize case studies
- Tie pieces to services
- Media-rich entries
- Curate featured work

Style-Finder control & media

Style-Finder management

NEW

- Manage quiz questions & style library
- Tune the recommendation mapping
- High-level now; full spec to follow

Media library

- Central store for images & video
- Reused across every page type
- Automatic media optimization

Pages & navigation

- Build dynamic pages & menus
- Re-order sections per page
- Show / hide & maintenance gating

Rich-text everywhere

- Tiptap editor across content types
- Consistent authoring experience
- Structured, clean output

Leads & analytics

NEW

Leads

- Every inquiry captured & tracked
- Service-of-interest on each lead
- Status workflow for follow-up

Analytics

- Traffic & engagement reporting
- Service-interest analytics
- Readable by Admin, SEO & Dev

Visitor tracking

- Privacy-aware behavior tracking
- Feeds analytics & insights
- Configurable from settings

Closing the loop

- Demand data informs the homepage
- Highlights the in-demand services
- Creative effort follows the signal

SEO engine & theming

SEO · GEO · AEO settings

- First-class control of metadata & schema
- Recommended redirects & canonicals
- Tuned for search and AI answer engines

UI settings / theme editor

- Adjust colors, type & styling live
- Brand-consistent across the site
- No deploy needed to restyle

Metadata at every level

- Per-page titles, descriptions & OG
- Structured data managed centrally
- Owned primarily by the SEO role

Redirects module

- Manage 301s & canonical targets
- Protects ranking through changes
- Recommended new addition

Users, logs, health & settings

Users & permissions

- Manage staff accounts & roles
- Fine-grained access by role
- Admin-only control

System logs

- Audit trail of key actions
- Who changed what, and when
- Accountability across the team

Site health & performance

- Exclusive Developer panel
- Monitors errors & performance
- Early warning before users notice

DEV

General settings

- Global site configuration
- Languages, tracking & toggles
- Single source of truth

SECTION SIX

Systems & Roles

The cross-cutting platform every feature stands on — and the four roles that govern access.

06

Cross-cutting systems

RBAC
Role-based access across the platform

Bilingual EN / AR
RTL-ready content & UI throughout

Scheduling
Auto-publish & content lifecycle

Audit logging
Every key action recorded

CMS engine
Page & section composition model

SEO / GEO / AEO
Structured-data & ranking engine

Media optimization
Fast, right-sized assets

Monitoring
Error & performance tracking

More that runs underneath

Rich-text authoring

- Tiptap editor across all content
- Clean, structured output
- Consistent everywhere

Visibility gating

- Maintenance mode & hidden pages
- Stage content before going live
- Per-section error isolation

Notifications

- Activity & new-lead alerts
- Keeps the team in the loop
- Surfaced in the dashboard

AI Style-Finder service

- The recommendation engine itself
- Shared between app & admin
- Spec to be finalized

The four roles

Admin

- Full access to everything
- Users, settings & all content
- Top of the access model

Content Creator

- Creates & edits content
- Services, blog, portfolio, media
- No user or core-settings access

SEO

- Owns SEO / GEO / AEO settings
- Metadata, schema & redirects
- Reads analytics; limited editing

Developer

- Full technical access
- Exclusive site-health panel
- Performance & error monitoring

SECTION SEVEN

Technology

Modern, performance-first foundations — chosen so a visually rich, animated site still loads fast.

07

Built on the Astro framework

Astro

An optimized web framework that ships minimal JavaScript by default — so a heavily animated, media-rich site still loads fast.

Fast by default

Static-first rendering keeps pages light and quick to load.

Animations stay smooth

Rich motion & video without the usual performance penalty.

Great for SEO / AEO

Fast, clean markup that search & AI engines love.

Flexible components

Build interactive parts where needed, static everywhere else.

Architecture at a glance

SECTION EIGHT

Roadmap & Open Items

What's intentionally staged for later — and the decisions still to lock down.

08

Open items & decisions

AI Style-Finder spec

- Define question logic & style taxonomy
- Choose the recommendation model
- Currently captured at high level only

Service-demand data

- Add service-of-interest to every lead
- Wire it into dashboard insights
- Unlocks demand-driven decisions

Gaming line

- Launches as a teaser first
- Expands into a full service later
- Placeholder in services now

Redirects module

- Recommended addition for SEO safety
- Manage 301s & canonical targets
- New collections: services, portfolio, styles

BRAIIN STATION

One platform: create the work, capture the demand, and prove what's working.

Thank you
